

Read Me CERES4.50.05 Whse. And Invt. Put Away Updates (Ceres4.50.05)

Service Request or Support:

Issue addressed: Creating a warehouse put-away does not properly suggest put-away bins. Maximum Pallets is ignored and all pallets are suggested into the same bin. Suggestions are made to the same bins even when those bins are already suggested on other un-posted warehouse put-away documents which results in most everything being suggested into the same bin.

| Type | ID | Name |
|----------|------|-----------------|
| Codeunit | 7313 | Create Put-away |

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue such that the "Max. Pallets" on the Bin record is taken into account when suggesting place bins on warehouse put-away documents. This includes determine the number of pallets currently residing in a given bin as well as the number of pallets suggested to be placed in that same bin on un-posted warehouse put-away documents.
