

Read Me CERES4.50.13 Qty. Available on Transfer Orders (Ceres4.50.13)

Service Request or Support:

Issue addressed: The Qty. Available can calculate incorrectly for a non-palletized item on a Transfer Order Line. Assume that you have an actual available quantity of 23 for a given item. Ceres will allow any quantity (up to the available 23) to be initially specified on the Transfer order. If however, the quantity is then adjusted to anything less than 23 (10 for example), Ceres will error stating that the quantity of 10 is greater than the available quantity of 0. This issue occurs because Ceres is not discounting the demand on the given Transfer Order line (e.g. Ceres is seeing the original 23 as demand and the 10 as additionally requested demand).

Type	ID	Name
Codeunit	14012258	Lot Management

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue to discount existing demand when the source of the existing demand is the same Transfer Order line for which additional demand is being requested.
