

Read Me CERES4.51.00 Excessive Quantities on Item Reclass Bin to Bin Mvmt.
(Ceres4.51.00)

Service Request or Support:

Issue addressed: The Item Reclassification Journal allows a non-palletized item to be entered on multiple lines within a journal batch. While the Quantity specified for any one line is not allowed to exceed the Lot's availability, Ceres does not prevent Quantities to exceed the Lot's availability across multiple journal lines. Posting of such a journal batch will result in incorrect Lot quantities across Bins.

Type	ID	Name
Codeunit	14012258	Lot Management

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by ensuring that multiple journal lines for the same Lot do not exceed the Lot's available quantity.
