Read Me_CERES4.51.02_Set Allow Modify of Web Orders as Default to TRUE on Agencies & Receivables (Ceres4.51.02)

Service Request or Support: The "Allow Modify of Web Orders" flag on Web Ordering tab of Agencies & Receivables Setup should be defaulted to TRUE and the field removed from the page. Setting this field to FALSE causes issues if Agency Express allows order modifications. If Agency Express does not allow order modifications, setting this field to TRUE does not cause any issues.

Type	ID	Name
Table	311	Sales & Receivables Setup
Page	459	Sales & Receivables Setup

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issues by:

1. Changing the default value of the "Allow Modify of Web Orders" field to YES on the Agencies & Receivables Setup table.
2. Changed the field property "Visible" of "Allow Modify of Web Orders" field to "FALSE" on the "Sales & Receivables Setup" page.
   Note: Users can still update this field manually if the setup record already exists. For new installs, the "Allow Modify of Web Orders" field will be set to YES and by default this field will not show on the page.
