Read Me_CERES4.51.20_Incorrect filter settings when calling Item Journal Batches page (Ceres4.51.20)

   Issue addressed: Page 262 - Item Journal Batches has code in the *OnOpenPage* event that sets the Template Name to the first Item Journal Template in the list. This prevents a user from be able to create new Item Journal Batch(s) for other templates. Additionally this code is causing issues with the drill down for the *Movement Xfer Batch Name*, *ADCS Phys. Inv. Jrnl Batch*, and *Shorts Cuts Batch Name* on the Warehouse tab of the Location card.

Type	ID	Name
Table	313	Inventory Setup
Page	262	Item Journal Batches

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by removing the code in table 313 (Inventory Setup, *Consolidation Batch* field) and in the OnOpenPage section of page 262 that is setting the page filters incorrectly.
