

Read Me Ceres4.51.24 Agency Non-Compliant to Compliant Status Update (Ceres4.51.24)

Issue addressed: Moving an agency from a non-compliant status to a compliant status should also generate an ITI file (just as it does when moving an agency's status from a compliant status to a non-compliant status). Without the ITI file, the agency's status does not get updated as viewed on the AE under Catalog -> Agency/Program Groups. Reference GCFD033 for corrective code.

Objects Affected:

Type	ID	Name
Report	14012364	Agency Reporting Compliance

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by adding functionality that updates the Agency Express Web user's Compliance status when moving from a non-compliant status to a compliant status.
