

Read Me Ceres4.51.27 Modify Synchronize Shoppers Functionality (Ceres4.51.27)

Issue addressed: The Synchronize Shoppers functionality has an incorrect element in the AddToQueue2 function resulting in Shoppers not being sent to the Agency Express.

Objects Affected:

Type	ID	Name
Codeunit	14012262	Outbox Processing

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by modifying the Synchronize Shoppers functionality. Previously the Web processing queue records created were incorrectly identified as credit limit records and not Shopper records. This release properly identifies the Web processing queue records as Shopper updates.
