

Read Me Ceres4.51.30 Do not allow Create Pallets or Assign Lots if Posting Date is blank (Ceres4.51.30)

Issue addressed: Positive adjustment Item Journals created with a BLANK posting date allows you to assign lots and create pallets. When you attempt to post you are forced to enter the posting date. But the lots and pallets created prior to entering the posting date are created with a blank receiving date.

Objects Affected:

Type	ID	Name
Codeunit	14012258	Lot Management

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issues by validating that a Posting Date is entered prior to creating pallets and assigning lots. When Create Pallets or Assign Lots is activated and Posting Date is blank, an error is displayed informing that the Posting Date cannot be empty.
