

Read Me CERES4.51.36 Posting and Shipment Date Synchronization for Standing Appointments (Ceres4.51.36)

Service Request or Support: N/A

Issue addressed:

The “Appointment Consumption Method” (found on Agencies & Receivables Setup) provides configuration for whether Ceres should consume standing appointments when an Agency Order is created.

“Sync. Posting Date / Shpt. Date” (also found on Agencies & Receivables Setup) provides configuration for whether Ceres should update the Posting Date on an Agency Order to match the Shipment Date (when Shipment Date is changed).

When “Appointment Consumption Method” is set to other than blank and the user elects to consume a standing appointment, Ceres will update the Shipment Date on the Agency Order to match the date for the standing appointment. However, when “Sync. Posting Date / Shpt. Date” is set to Yes, Ceres should also update the Posting Date on the Agency Order, but currently it is not.

Program A0442 has a Standing Appointment for 4:00:00 PM on 08/27/18. Entering this Date/Time will consume the Standing Appointment. Continue?

Yes

No

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by ensure that when configured as such, the Posting Date on the Agency Order is updated to match the Shipment Date.
