

## Read Me CERES4.51.53 Agency Pallet Tracking (Ceres4.51.53)

Service Request or Support: SR-0001909

Issue addressed: Once Inventory Picks or Warehouse Shipments have been shipped, Ceres considers the related inventory to be gone from the Location. While it is true that at this stage the inventory will have been pulled from its bin, it may actually still reside at the Location in the form of staged inventory. Prior to this release, Ceres did not provide a manner of tracking staged inventory (aka Agency Pallets). With this release Ceres provides for Agency Pallet tracking to the point of distribution.
