

Read Me Ceres4.51.62 Prohibit modifications to Gross Weight when an Item has active transactions (Ceres4.51.62)

Service Request or Support Case: N/A

Issue addressed: When changing the Unit Gross Weight on an Item Card, the system checks for open Item Ledger Entries (ILE's) and prevents Unit Gross Weight change if open ILE's are found. Ceres needs to include a check that the Item is not referenced on in process transactions (Donation Order, Purchase Order, Agency Return Order/Agency Credit Memo, In Bound Transfer, or Item Journal Entry of entry type Purchase or Positive Adjustment) before allowing the Items Unit Gross Weight to be changed.

Objects Affected:

Type	ID	Name
Table	27	Item
Codeunit	6620	Copy Document Mgt.

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by evaluating whether an Item has an in-process transaction (open Donation Order, Purchase Order, Agency Return Order/Agency Credit Memo, In Bound Transfer, or Item Journal Entry of entry type Purchase or Positive Adjustment) when a change is made to its "Gross Weight". When an in-process transaction exists, an error is generated and the change of the Item's Gross Weight is not allowed.
