

Read Me CERES4.51.77 Agency Order Location Override (Ceres4.51.77)

Service Request or Support: SR-0002542

Issue addressed: It is desired to provide functionality that allows for agency order appointments to be tied to one schedule (location) yet have items fulfilled from a different location. For example, an agency may be configured for the TOP (Topeka) location via their location code (on the Agency Card), yet it is desired that agency orders for this agency are fulfilled from the KAN (Kansas) location; while maintaining the agency's relationship to the appointment schedule(s) for the TOP location.

| Type | ID | Name |
|----------|----------|--------------------|
| Table | 14 | Location |
| Table | 36 | Sales Header |
| Table | 37 | Sales Line |
| Codeunit | 14012261 | Inbox Processing |
| Codeunit | 14012264 | Validate Web Order |
| Page | 5703 | Location Card |

This release presents a change in system usage methodology. The following procedure documents were updated accordingly.

1. Location Overview.docx

Resolution: Ceres was enhanced according to the noted Service Request.
