

Read Me_CERES5.00.25_Permissions error upon Adjust Cost Posting
(Ceres5.00.25)

Service Request or Support: N/A

Issue addressed: When posting Item Transactions that can trigger Adjust Cost posting (Inventory Pick Posting, Negative Inventory Adjustment, etc.) or running the Adjust Cost – Item Entries batch job Ceres can fail with an Item Ledger Entry table permissions error.

Type	ID	Name
Table	32	Item Ledger Entry

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the issue by including the necessary permissions in the Item Ledger Entry table to allow the Adjust Cost Posting process to complete successfully.
