

Read Me_CERES5.00.29_Grocery Rescue - Unbalanced transactions (Ceres5.00.29)

Service Request or Support: SR-0002671

Issue addressed: Food banks routinely processes grocery rescue batches with both donations and distributions whereby the distributions are less than the donations. The excess inventory is just left in the inventory location for further processing at a later time such as sorting or repacking into other items.

The current grocery rescue batch system requires that any sheet with both donations and distributions be balanced. Feeding America would like this requirement removed so that the batches can be processed as long as the donations equal or exceed the distributions.

Type	ID	Name
Table	14012522	Grocery Rescue Header
Report	14012577	Import Grocery Rescue Batch

This release presents a change in system usage methodology. The following procedure documents were updated accordingly.

1. Enhanced Grocery Rescue Excel Import.docx

Resolution: Ceres was enhanced to address the enhancement according to the indicated procedure document.
