Read Me_CERES5.00.46_Kitting Updates and Enhancements (Ceres5.00.46)

Service Request or Support: SR-0002720

Issue addressed: This release provides for several updates and enhancements related to kitting and advanced kitting.

1. The "Cost of Disassembly Account" control was added to the General Posting Setup page.
2. The "Unit Gross Weight" is now assigned on the BOM Journal Line when components are retrieved for non-advanced kitting. This enhancement also addressed an issue of not being able to post a non-advanced kitting journal due to the incorrect weight.
3. The Break Bulk process was enhanced to respect inventory reserved on other transactions.
4. The Retrieve Components process was enhanced to respect inventory reserved on other transactions.
5. The Affiliate Zero Quantity Lines process was updated to assign the weight associated with the affiliate-from BOM Journal Line to the affiliate-to BOM Journal Line.
6. Kit item fees calculation was enhanced to respect the "Calculate Agency Fees from" configuration on Agencies & Receivables Setup.
7. The Calculate Inventory process was enhanced to suggest kit output layers even if such layers have not been completely invoiced.

See the indicated service request and procedure documents for additional information.

Type	ID	Name
