

Read Me Ceres5.00.70 Default the Grant Calculation Method's  
Effective Date (Ceres5.00.70)

Service Request or Support Case:

Issue addressed: When creating a Grant that has Grant Calc Methods, if the effective date on the Grant Calc Method is greater than the Effective Date of the Grant, the Calc. Method will not apply until the Calc Method effective date.

Objects Affected:

Type	ID	Name
Table	14012275	Grant Calc Method
Table	14012290	Grant
Page	14012414	Grant Calc. Method

This release does not present a change in system usage methodology.

Resolution:

- On page 140124144 (Grant Calc. Method), defaulted the Grant Calc Method Effective Date to the Effective Date of the Grant when the Calc Method is created and added a confirmation message when the Calc Method Eff. Date is greater than the Grant Start Date.

- On Table 14012290 (Grant), added a warning to field 'Effective Date', similar to the warning on page 140124144 (Grant Calc. Method).

Also: Set NotBlank field property for 'Effective Date' to true in Table 14012275 (Grant Calc. Method).
