

## Read Me Ceres5.00.73 Only Message for Date Changes on DO PO if Lot Setup Exists (Ceres5.00.73)

Service Request or Support Case:

Issue addressed: On a DO/PO etc., when the Posting Date, Order Date, or Expected Receipt Date field is changed, a message pops up for G/L Accounts and when there is not a lot calculation formula setup on the Item. This causes users to have to select Y or N to the message that has no impact in these instances. Would like the message to only pop up when Type = Item and lot formulas are setup on the Item Card.

Objects Affected:

Type	ID	Name
Table	38	Purchase Header

This release does not present a change in system usage methodology.

Resolution:

- Table 38 (Purchase Header) is updated, by adding functionality to function 'UpdatePurchLines', to only display the date warning message for a lot if at least one of the 3 Item Lot Calculation Formula fields are populated ('Expiration Calculation', 'Consume by Date Calculation' or 'Ship by Date Calculation').

Created a dedicated function 'ValidateLotDates' to support the update.
